What is the Opensource idea

- Share to be faster and better

- Collective knowledge is "infinite"

- Motivated individuals are more creative

- Ethical obligation to make new knowledge available to everybody

- Long term sustainability

Opensource questions

- What hinders in embracing open source / open data?

- If it's free its there must be a catch!

- Its for geeks only – I don't code anyway

- I never had to used it so it must be irrelevant

- I can't get corporate support

- I don't care
